

RAHUL SONI

Backend-Focused Full-Stack Developer · Node.js · Express · MongoDB

Jaipur, India (open to relocation) | +91-9024141779 | rahulsoni66676@gmail.com

 GitHub |  LinkedIn |  Portfolio |  Hashnode

SUMMARY

Backend-focused Computer Science student specializing in building and deploying secure, production-grade Node.js/Express REST APIs backed by MongoDB (OAuth 2.0, JWT, role-based access control, atomic Cloudinary rollbacks, and real-time Socket.IO systems). Seeking SDE / Backend Developer internship and new-grad roles.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, C++, C
Backend:	Node.js, Express.js, REST API Architecture, JWT, Google OAuth 2.0 (Passport.js), bcrypt, RBAC, Socket.IO, Multer, Cloudinary
Databases:	MongoDB, Mongoose (Schema modeling, Compound indexes, Aggregation pipelines), MongoDB Atlas
Frontend:	React.js, Redux, React Router, Axios, Tailwind CSS, Bootstrap, HTML5, CSS3, Recharts, Chart.js
Developer Tools:	Git, GitHub, Postman, Vercel, Render
Core CS:	Data Structures & Algorithms (C++), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

PROJECTS

KaviosPix — Photo Management REST API & Cloud Storage

[Live Demo](#) | [GitHub](#) | Sep 2026

Node.js, Express, MongoDB, Passport.js (Google OAuth 2.0), JWT, Multer, Cloudinary, React

- Designed a 16-endpoint REST API for albums, images, tags, comments, favorites, and sharing; enforced owner vs. shared permissions via reusable middleware and scoped queries that eliminate IDOR vulnerabilities.
- Architected Google OAuth 2.0 auth issuing stateless JWTs, alongside a Multer → Cloudinary upload pipeline (5MB limit, MIME checks) that rolls back the cloud upload if database persistence fails.
- Engineered paginated tag search backed by 3 compound indexes; hardened API security using Helmet, CORS allowlists, and express-rate-limit (100 req/15 min).

Chatter — Real-Time One-to-One Messaging Platform

[Live Demo](#) | [GitHub](#) | Sep 2026

Node.js, Express, Socket.IO, MongoDB, bcrypt, React

- Built an event-driven Socket.IO messaging engine with per-user private rooms and acknowledgement callbacks that ensure verifiable message delivery to senders.
- Engineered real-time message tracking with sent → delivered → read receipts persisted in MongoDB, paired with live typing indicators synchronized over 6 client and 5 server socket events.
- Created a responsive chat frontend with active user indicators, unread badges, and auto-scroll message feeds; deployed backend on Render and frontend on Vercel.

Anvaya CRM — Lead Management REST API & Analytics Dashboard

[Live Demo](#) | [GitHub](#) | Aug 2026

Node.js, Express, MongoDB, JWT, bcrypt, React, Recharts

- Developed 19 REST endpoints across 6 modules (leads, agents, comments, reports) with bcrypt password hashing and 7-day JWTs (17 protected routes, 6 admin-restricted with 401/403 authorization).
- Implemented a robust server-side query layer supporting 5 multi-field filters (status, priority, agent, tags, search), 8 whitelisted sort orders, and pagination with total counts.
- Engineered pipeline analytics using MongoDB aggregation (\$match, \$group, \$lookup, \$project) visualized via Recharts; published technical architectural breakdown on Hashnode.

Workasana — Task & Project Management REST API

[Live Demo](#) | [GitHub](#) | Aug 2026

Node.js, Express, MongoDB, JWT, bcrypt, React, Chart.js

- Architected an 18-endpoint REST API (16 secured via JWT) across 5 relational Mongoose schemas (Users, Projects, Teams, Tasks, Tags) featuring automatic task ownership delegation.
- Implemented multi-criteria filtering by team, owner, status, priority, and custom tags with dynamic sorting and due-date tracking.
- Built sprint reporting endpoints aggregating completed tasks, pending backlogs, and team distribution, charted dynamically in React with Chart.js.

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2024:** Selected and participated in SIH 2024, a prestigious national-level innovation hackathon organized by the Ministry of Education, Government of India.

EDUCATION

B.Tech in Computer Science & Engineering — JECRC University, Jaipur

2023 – Jun 2027 (Expected)
